

## **TBPG RELIEF FOR LICENSE HOLDERS IN DECLARED DISASTER COUNTIES**

**Counties Under Declaration:** Brazoria, Chambers, Galveston, Hardin, Harris, Jasper, Jefferson, Liberty, Matagorda, Montgomery, Newton, Orange and San Jacinto

### **EXTENSION OF TIME GRANTED FOR LICENSE RENEWALS**

PG licenses, GIT certifications, and Geoscience Firm registrations in a designated disaster county that are scheduled to expire in September, October, or November of 2019 will be **extended to expire on December 31, 2019.**

- Licenses that would have expired during these months will not appear in a public license search. TBPG has a [link](#) on its website that displays a list of impacted licenses as a supplemental license search. The supplemental license search serves as an online verification of licensure equal to the current online license search.
- Late renewal fee. Normally if a license is renewed 60 days or more after it is expired, a \$50 late fee applies. Licenses in disaster counties that would have expired at the end of September, October and November 2019 can **renew as late as December 30, 2019 without penalty.**

### **REPLACEMENT OF LICENSE CREDENTIALS AT NO COST**

If a PG License, GIT certification, or Geoscience Firm registration certificate or renewal card was lost or destroyed in the storm, please contact TBPG at 512.936.4400 and **we will provide a replacement at no cost.**

**TBPG is committed to assisting our license holders affected by Tropical Storm Imelda. We encourage impacted license holders to contact our office at (512) 936-4400 regarding any issues with renewal applications, new license applications, continuing education, compliance, or any other issue with which we might be able to assist.**

Rene D. Truan  
TBPG Executive Director
